Create a New Task – Not Started Tasks Group

Introduction:

This section highlights the key steps when creating a new task. Refer to the Column Description page for detailed instructions.

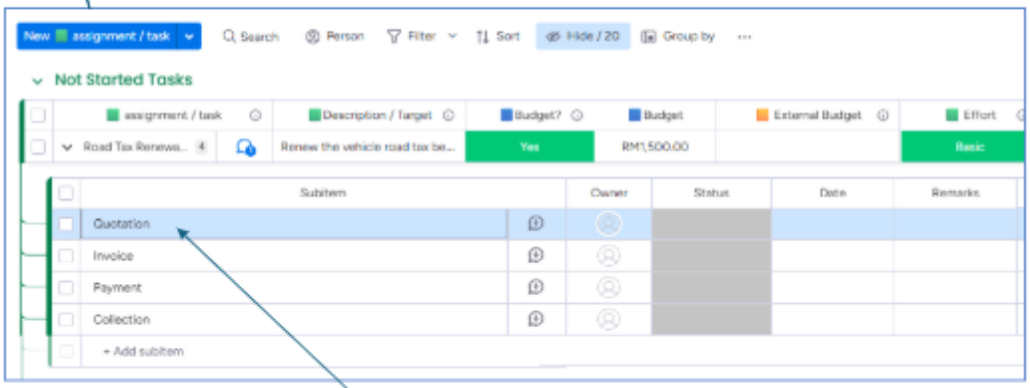

Board Access
Ensure the Tasker, Taskee and relevant PIC have access to the board.
Note: Only authorised users should be invited. Board access must be granted before users can view or update their assigned tasks.

Use this view to create and set up new tasks easily.

When using a shared email account, **FIRST select a dedicated PIC** to identify the person responsible for handling the task and its notifications, **BEFORE entering the shared email address in the Taskee column.**
Note: This ensures clear task responsibility and proper follow-up.

⚠ **Important:** Complete all required task details and assign the responsible person before changing the Work Status to **Assigned**.

Note: Use subitems to track individual work stages. Update their status as each stage progresses.

Progress Monitoring – Active Task Group

Introduction:

Use the Progress Monitoring view to track active tasks, identify pending actions, and monitor work progress. Filter tasks by PIC or Work Status to locate specific tasks quickly, especially when managing a large number of tasks.

1. Filter by PIC / GROUP / WORK STATUS

Filter by PIC

Instruction: Use the Filter option in the PIC column to display tasks assigned to a specific person.

Sample: PAVIN

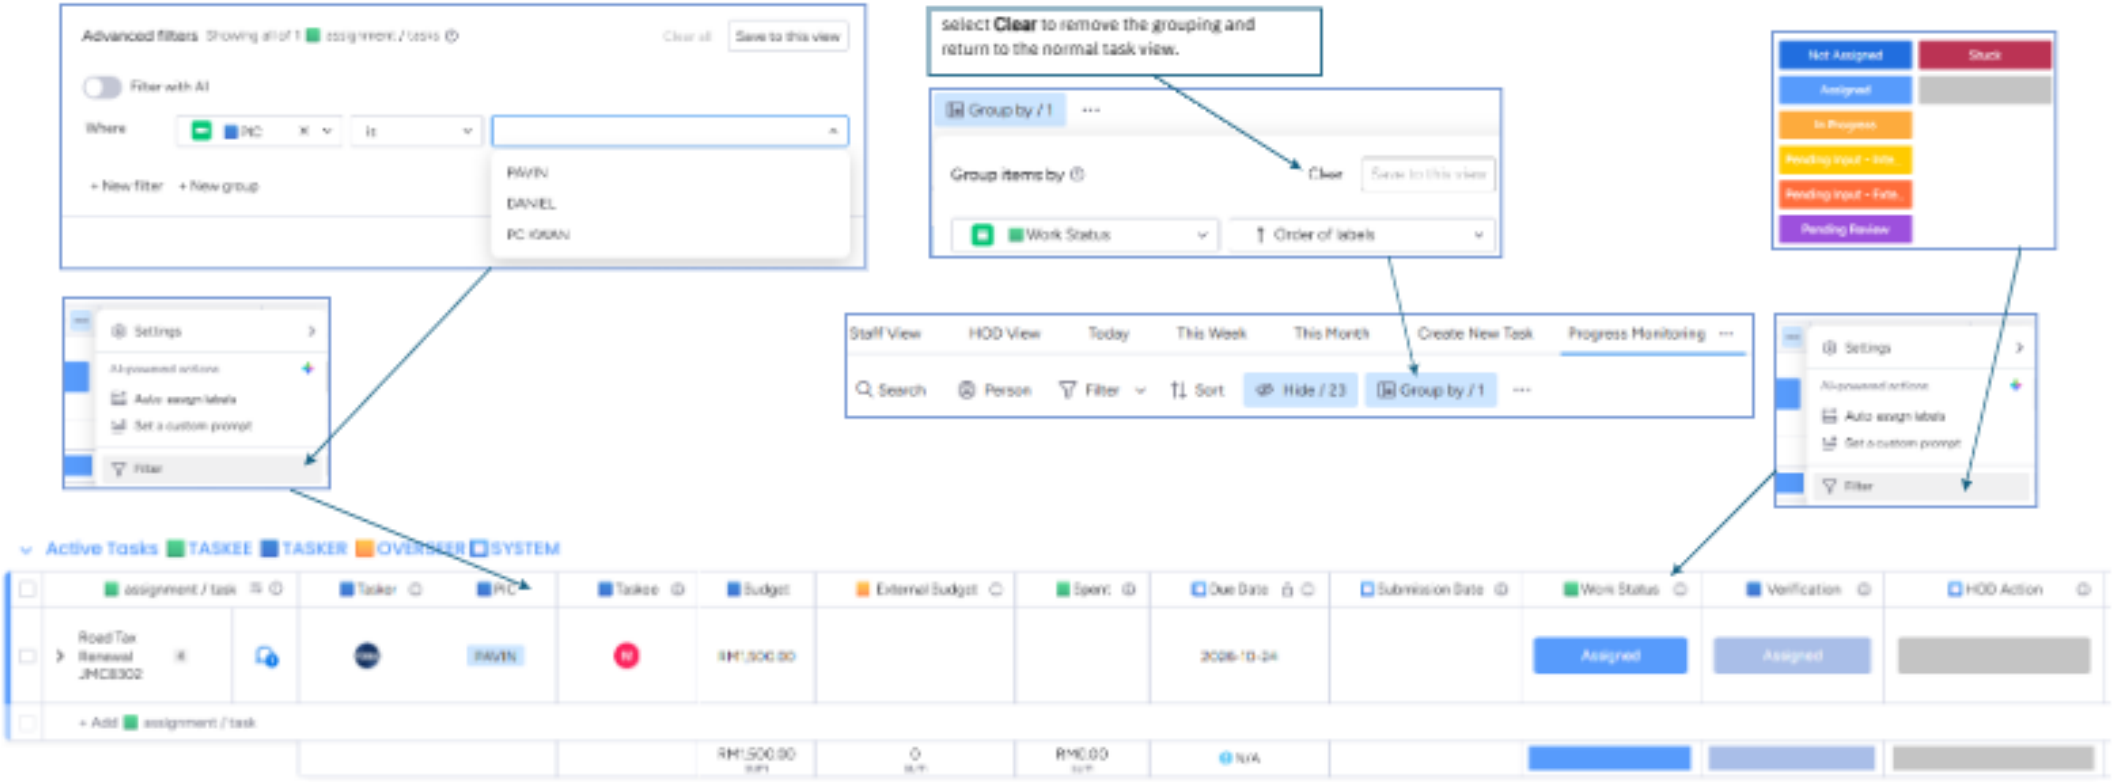

Note: Helps users focus on tasks under their responsibility, especially when there are many tasks.

Filter by Work Status

Instruction: Use the Filter option in the Work Status column to display tasks with a specific status.

Sample: Assigned

Note: Helps users quickly identify tasks requiring action or follow-up.

2. WORK FLOW
