MONDAY.COM

TASK MANAGEMENT – USER GUIDE

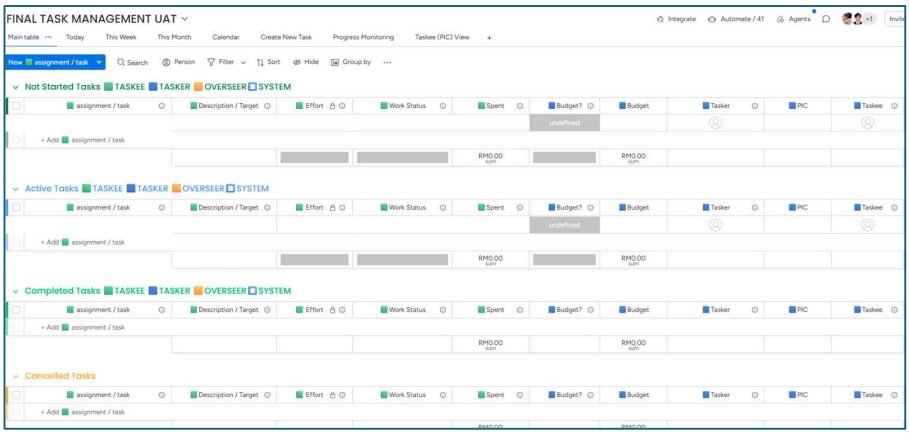

Version: 1.0 (UAT)
Prepared by: Management & Administration (MA) Department
Date: October 2026

1. INTRODUCTION TO MONDAY.COM

monday.com is an online work management platform that helps teams organise tasks, collaborate, monitor progress, and manage daily activities in one centralised system.

It allows users to assign responsibilities, set deadlines, share updates, and track work progress efficiently.

2. TASK MANAGEMENT BOARD

The Task Management Board is designed to simplify task assignment, progress monitoring, communication, and performance evaluation.

The system enables:

- **HOD / Tasker:** Create tasks, assign responsibilities, monitor progress, verify completed work, and evaluate performance.
- **Staff / Taskee:** Carry out assigned tasks, update work status, report progress, and submit completed work for verification.
- **System Automation:** Send notifications, update task records, and automatically move completed or cancelled tasks to the appropriate groups.

Tasks are organised into four groups: **Not Started, Active, Completed, and Cancelled.**

3. ABOUT THIS USER GUIDE

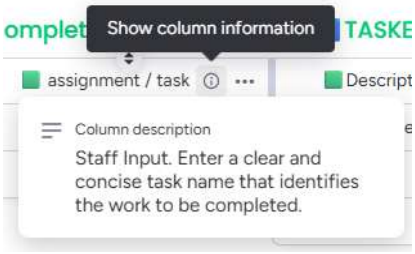

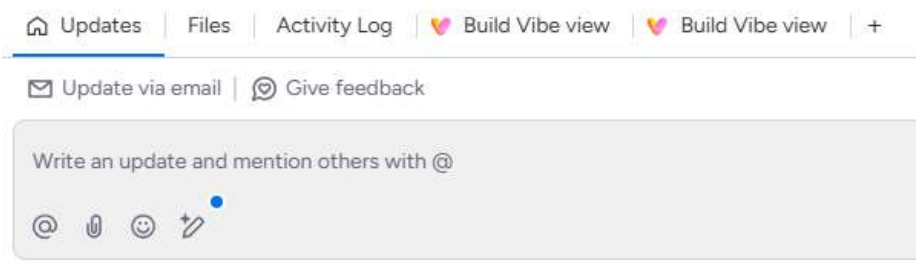

This guide provides step-by-step instructions with screenshots to help users understand and operate the Task Management Board.

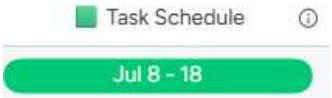

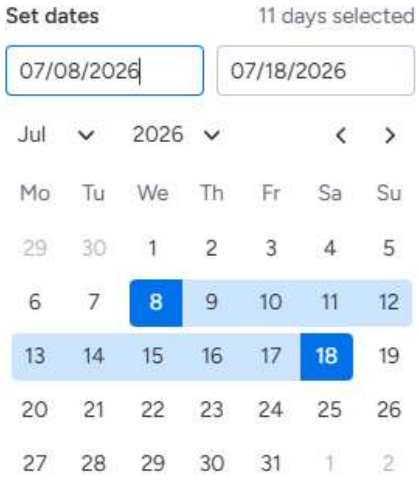

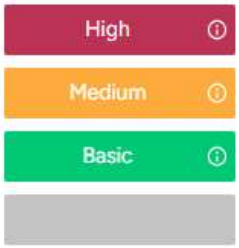

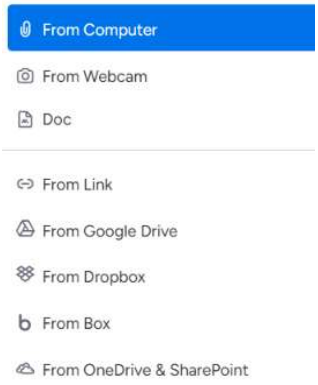

The guide covers:

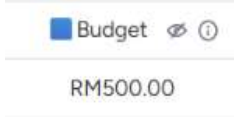

1. **Board Views & Groups** – Navigate and understand task organisation.
2. **Column Description** – Understand the purpose and function of each column.
3. **Create New Task** – Create, configure, and assign tasks.
4. **Progress Monitoring** – Track progress, provide feedback, and complete HOD verification.
5. **Assignments** – Complete guided and independent task creation exercises to assess HOD understanding, practical skills, and readiness to use the Task Management Board.

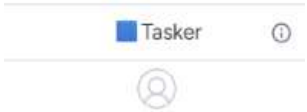

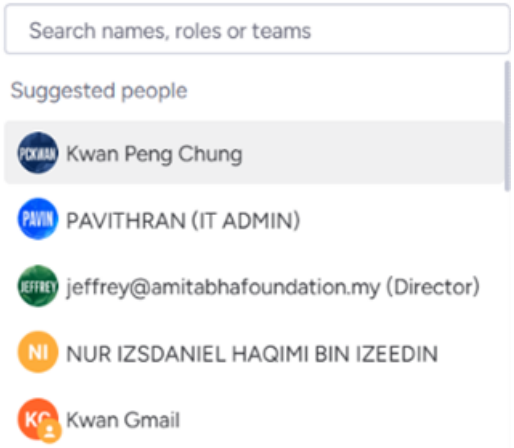

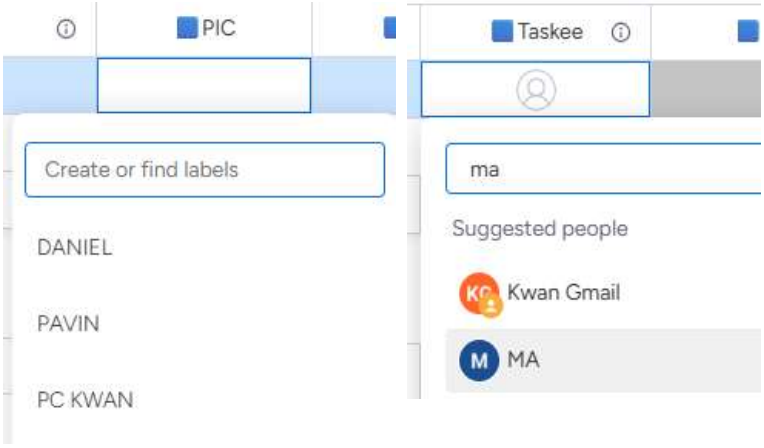

Purpose: To ensure all users can manage tasks consistently, efficiently, and with clear accountability.

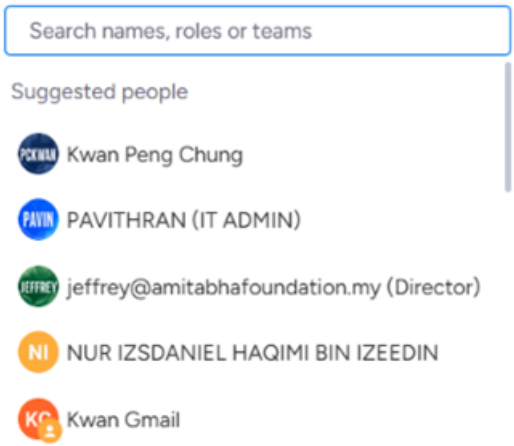

COLUMN

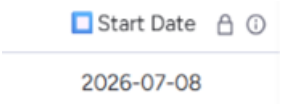

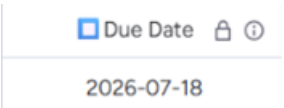

1	
Sample	Select Tasks
	Select the checkbox beside the task to display the available actions: 
2	
Instruction	Enter a unique task name
Sample	Renewal License (Sample)
3	
Sample	indicate additional information, instructions, or helpful tips.
	
4	
Instruction	Add Update / Comment - Enter your update, comment, or progress information. - Use @mention to notify colleagues when necessary. - Attach supporting documents or images using the icon. - Click Update to post your comment.
Sample	
5	
Instruction	To create a new task.
Sample	Fire Extinguisher Servicing & Renewal (Sample)
6	
Instruction	Enter a clear task description, including the work to be performed and the expected outcome.
Sample	Ensure timely renewal of the license before its expiry date, including preparation of required documents, submission of application, payment of fees, and obtaining the renewed license. (Sample)

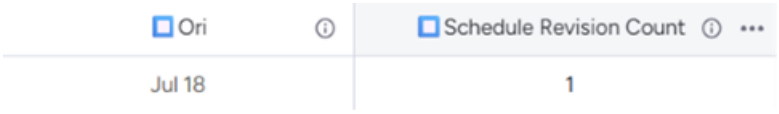

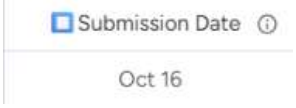

7	
Instruction	Select the task start date and end date.
Sample	
8	
Instruction	Select the level of effort required to complete the task.
Sample	Medium
	 Complex tasks requiring significant effort. Tasks requiring moderate effort. Simple, routine tasks requiring minimal effort. Effort level not yet assigned.
Note:	Assess the effort based on task complexity and workload.
9	
Instruction	Upload supporting documents, images, or other evidence related to the task to confirm work progress or completion.
Sample	
Note:	Attach relevant supporting evidence for HOD review and verification. Files can be uploaded from your computer, OneDrive, SharePoint, or other available sources.

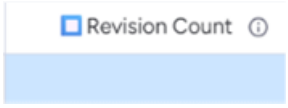

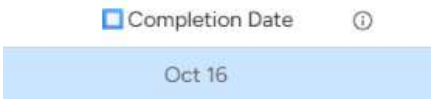

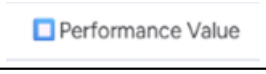

10	
Instruction	Select the appropriate work status to indicate the current progress of the task.
Sample	Assigned  Task has not been assigned. Task has been assigned but work has not started. Task is currently being carried out. Awaiting information or action from internal parties. Awaiting information or action from external parties. Task has been submitted for HOD review. Task cannot proceed due to an issue.
Note:	Update the work status whenever there is a change in task progress.
11	
Instruction	Select whether the task requires a budget or involves any expenditure.
Sample	Yes (Licence renewal fees are required.)  Task requires expenditure or budget allocation. Task does not require any expenditure. Budget requirement has not been determined.
Note:	Select Yes even if the expenditure is small.
12	
Instruction	Enter the estimated budget required to complete the task
Sample	500 (Estimated licence renewal fee.) 
Note:	Enter the estimated amount based on the expected expenditure.

13	
Instruction	Select the person responsible for assigning and overseeing the task.
Sample	(HOD) 
Note:	The Tasker is responsible for assigning the task, monitoring progress, and following up with the Taskee
14	
Instruction	If using a shared email (ma@amitabhafoundation.my), select a dedicated PIC to identify the person responsible for handling the task and its notifications.
Sample	PIC: PC KWAN Taskee: MA (Shared Email)
Note:	Select the PIC first, followed by the shared email account. This ensures clear accountability for task notifications and follow-up.

15	
Instruction	Select the person responsible for carrying out and completing the assigned task.
Sample	Kwan Peng Chung (Staff) 
Note:	The Taskee is responsible for performing the task, updating work progress, and submitting the completed work to the Tasker for review.
16	
Instruction	Select the appropriate verification status to confirm task progress, provide feedback, or approve completed work.
Sample	Done (Licence renewal completed and verified.) 

17	
Instruction	Enter comments, feedback, or instructions regarding the task's progress or completed work.
Sample	Licence renewal completed. No further action required.
Note:	The Tasker/HOD should provide clear feedback, particularly when revisions or additional actions are required.
18	
Instruction	The Tasker/HOD evaluates the Taskee's work performance and selects the appropriate score.
Sample	2 – Meet Expectation  Work exceeds the required standards. Work meets the required standards. Work requires improvement. Work fails to meet the required standards. Performance has not been assessed.
Note:	The Tasker/HOD should assess performance based on work quality, accuracy, and task completion.
19	
Instruction	Automatically indicates the task's overall health based on its progress and status.
Sample	 Task requires immediate attention.
Note:	System-generated indicator. No manual input required.
20	
Instruction	Enter the budget allocated for external parties, if applicable.
Sample	Leave Blank
Note:	Leave blank if no external contractor, supplier, or service provider is involved.
21	
Instruction	Automatically displays the task start date based on the Task Schedule.
Sample	8/7/2026
Note:	System-generated field. No manual input required. The date is automatically updated according to the Task Schedule.
22	
Instruction	Automatically displays the task due date based on the Task Schedule.
Sample	18/7/2026
Note:	System-generated field. No manual input required. The due date is automatically calculated from the Task Schedule.

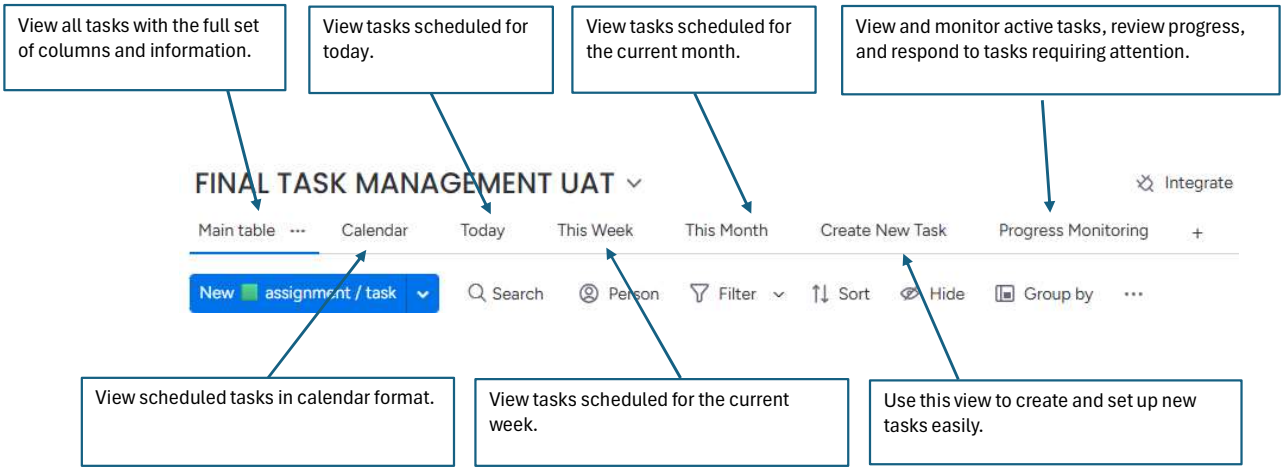

23	
Instruction	Automatically records the original due date and the number of schedule revisions.
Sample	Original Due Date: 18 July 2026 Schedule Revision Count: 1
Note:	System-generated fields. No manual input required. Used to track original deadlines and schedule changes.
24	
Instruction	Automatically records the date when the Taskee submits the task for review.
Sample	16-Oct-26
Note:	System-generated field. No manual input required. Used to track task submission dates and evaluate whether work was submitted on time.
25	
Instruction	Automatically indicates the task's current condition and whether HOD attention is required. On Track — Task is progressing as planned. Attention — Task requires attention due to potential delays or issues. Critical — Task is overdue or requires urgent action. HOD Action — Task requires HOD review, verification, or decision. No RAG status assigned.
Note:	System-generated field. No manual input required. Used to highlight tasks requiring attention or HOD action.
26	
Instruction	Automatically identifies specific task conditions that require attention or follow-up. Overdue — Task has exceeded its due date. Due Soon — Task is approaching its due date. Pending Input — Task is awaiting information or action. Stuck — Task cannot proceed due to an issue. Revision Required — Task requires corrections or improvements. Pending Review — Task is awaiting HOD review or verification. No trigger condition is currently identified.
Note:	System-generated field. No manual input required. Used to identify task conditions and support automated RAG indicators.

27	
Instruction	Review & Resolve — Review critical issues and take corrective action. Review Progress — Check task progress and address potential delays. Review & Follow Up — Follow up on pending information or outstanding actions. Monitor Revision — Monitor corrections or revisions requested from the Taskee. Review Submission — Review submitted work and provide verification or feedback. No HOD action currently indicated.
Note:	System-generated field. No manual input required. Used to guide HODs on necessary follow-up actions.
28	
Instruction	Automatically records the number of times the Taskee's work is returned for revision by the Tasker/HOD.
Sample	No Revision
Note:	System-generated field. No manual input required. Used to track work revisions and evaluate task performance.
Important:	This tracks work revisions, not changes to the Task Schedule (Step 20).
29	
Instruction	Automatically records the date when the task is verified as completed by the Tasker/HOD.
Sample	16-Oct-26
Note:	System-generated field. No manual input required. Used to track actual task completion dates and evaluate timely completion.
30	
Instruction	Delivery Score /3 (Evaluates whether the task was completed within the original deadline.) Budget Performance (Indicates whether actual expenditure is within the approved budget.) Budget Score /3 (Calculates the budget performance score based on the configured criteria.)
Note:	System-generated fields. No manual input required for calculated scores. Used to evaluate task delivery and budget performance.
Important:	Budget Performance may require HOD input, depending on the column configuration.
31	
Instruction	Automatically calculates the overall task performance value based on the configured scoring criteria.
Sample	Performance value calculated by the system.
Note:	System-generated field. No manual input required. Used to support overall task performance assessment.
32	
Instruction Sample	Automatically calculates the total task score based on three performance criteria. Total Score value calculated by the system.
Note:	System-generated field. No manual input required. Used to evaluate overall task performance based on work quality, timely delivery, and budget management.

Board Views – Task Management

Instruction:

Select the appropriate view to create, manage, or monitor tasks according to your needs.

Note: Each view displays task information differently to simplify daily operations. Switching between views does not change the underlying task data.

Board Groups – Task Management

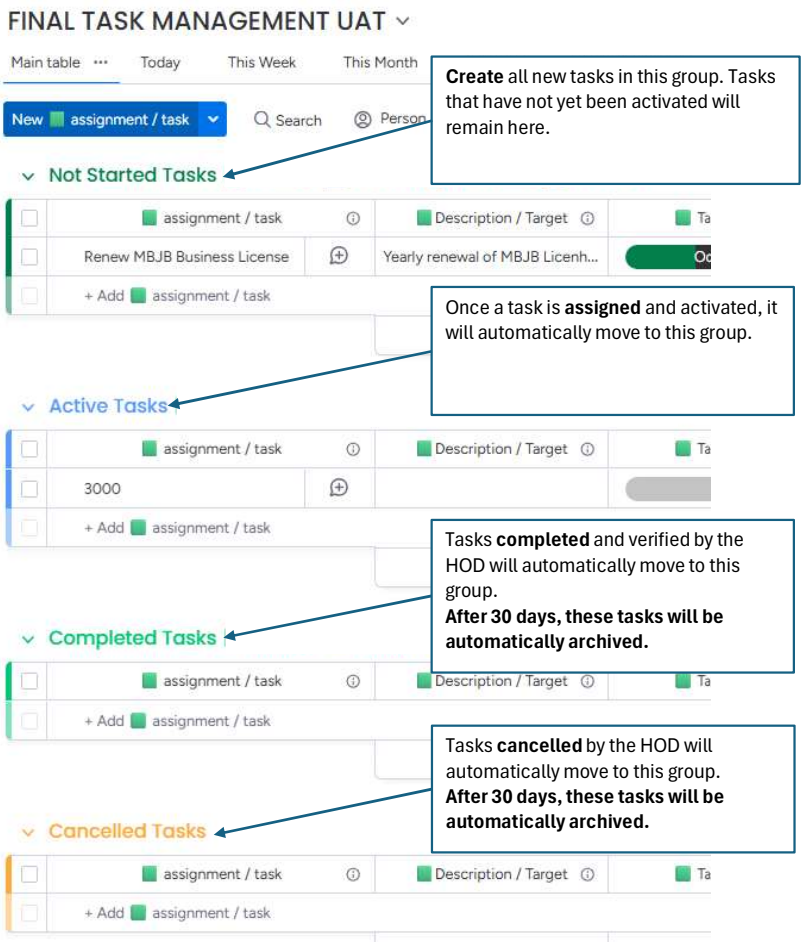

Instruction:

The Task Management System is designed to simplify task assignment, progress tracking, and monitoring through monday.com.

Tasks are organised into four groups: Not Started, Active, Completed, and Cancelled.

Tasks will automatically move between groups based on their status and HOD verification. Completed and cancelled tasks will be automatically archived after 30 days to keep the workspace organised.

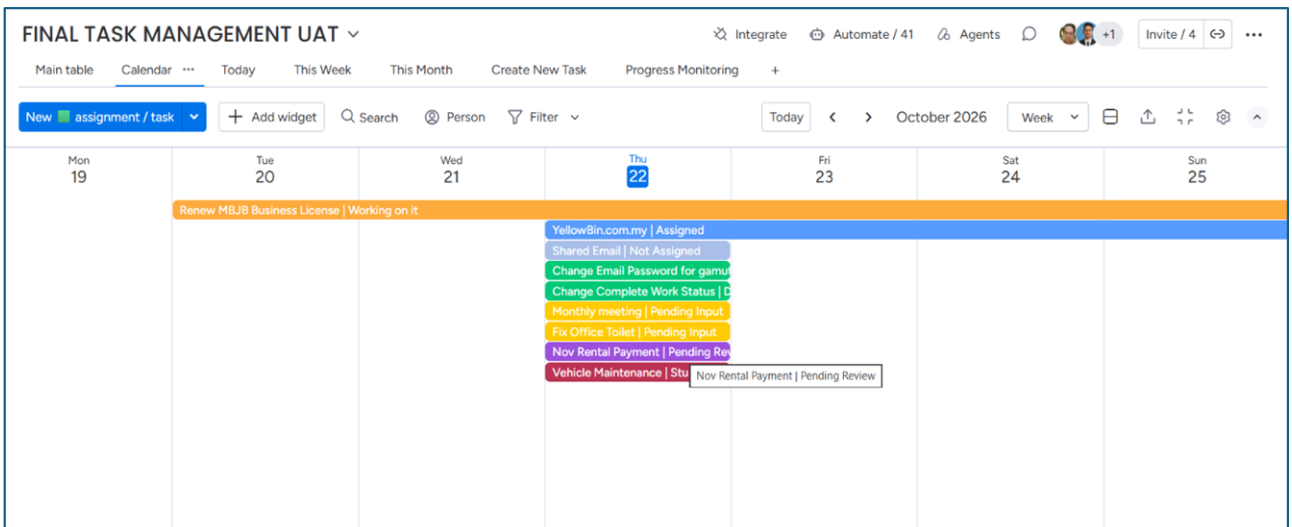

This system helps staff and HODs manage daily assignments efficiently while maintaining clear accountability and task records.

Calendar View – Task Management

Introduction:

The Calendar View displays scheduled tasks in a monthly, weekly, or daily calendar format. It helps users visualise task schedules, monitor deadlines, and plan upcoming activities.

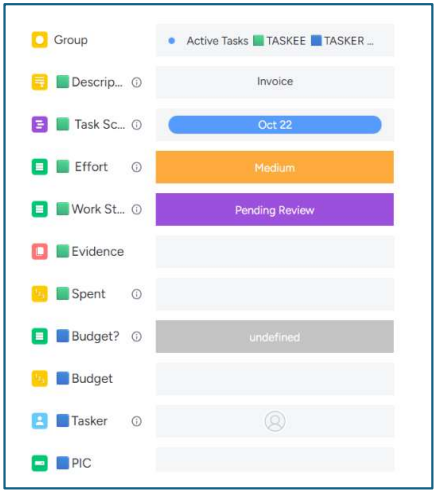

Instruction:

Click the Calendar tab to view tasks according to their scheduled dates. Use the navigation arrows to move between periods or select Month, Week, or Day to change the display.

Note: Tasks are displayed based on their Task Schedule. Where configured, task colours can indicate their status for easier progress monitoring.

Calendar View (Task Detail) – Task Management

Introduction:
Clicking a task in the Calendar View opens its details, allowing users to review task information, responsibilities, schedules, and current progress.

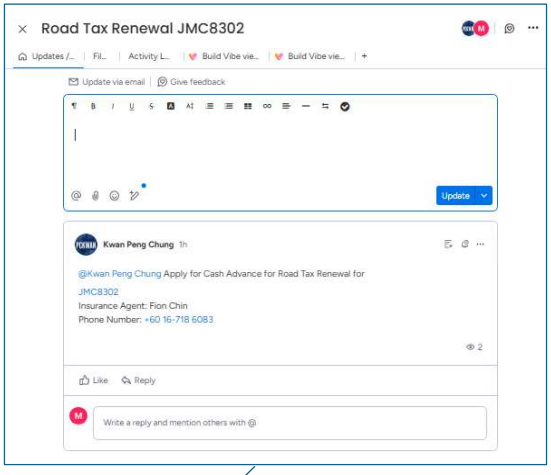

Instruction:
Click any task displayed on the calendar to open the Task Details window. Review the information and update the relevant fields according to your assigned responsibilities and permissions.

Note: Changes made in the Task Details window are reflected in the Main Table and other board views. Users should only modify fields they are authorised to manage.

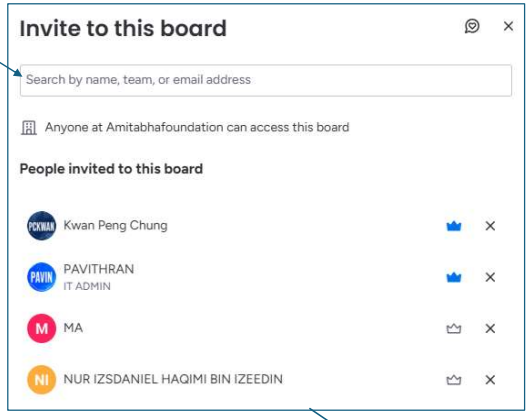

Create a New Task – Not Started Tasks Group

Introduction:

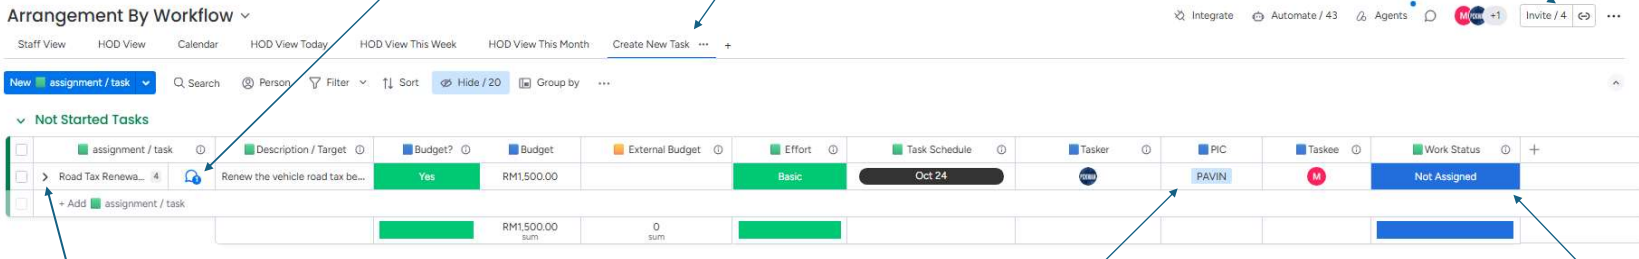

This section highlights the key steps when creating a new task. Refer to the Column Description page for detailed instructions.

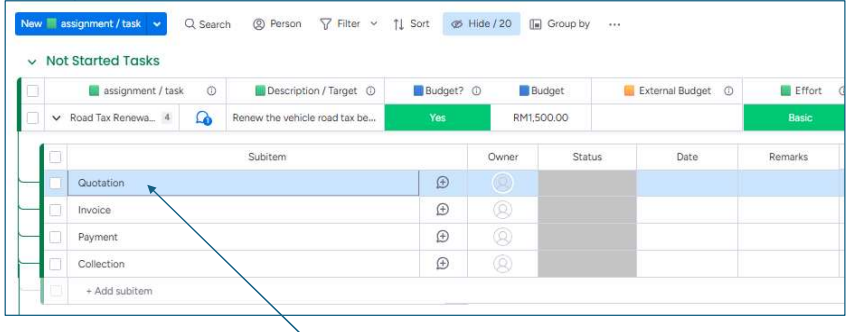

Board Access
Ensure the Tasker, Taskee and relevant PIC have access to the board.
Note: Only authorised users should be invited. Board access must be granted before users can view or update their assigned tasks.

Use this view to create and set up new tasks easily.

When using a shared email account, **FIRST select a dedicated PIC** to identify the person responsible for handling the task and its notifications, **BEFORE entering the shared email address in the Taskee column.**
Note: This ensures clear task responsibility and proper follow-up.

⚠️ **Important:** Complete all required task details and assign the responsible person before changing the Work Status to **Assigned**.

Note: Use subitems to track individual work stages. Update their status as each stage progresses.

Progress Monitoring – Active Task Group

Introduction:

Use the Progress Monitoring view to track active tasks, identify pending actions, and monitor work progress. Filter tasks by PIC or Work Status to locate specific tasks quickly, especially when managing a large number of tasks.

1. Filter by PIC / GROUP / WORK STATUS

Filter by PIC

Instruction: Use the Filter option in the PIC column to display tasks assigned to a specific person.

Sample: PAVIN

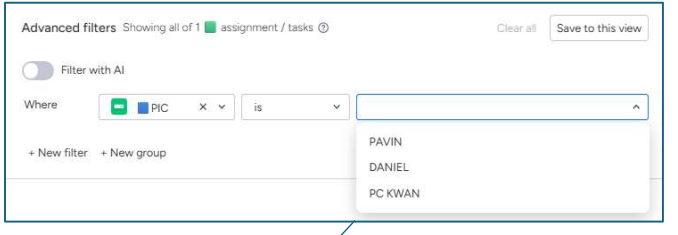

Note: Helps users focus on tasks under their responsibility, especially when there are many tasks.

Filter by Work Status

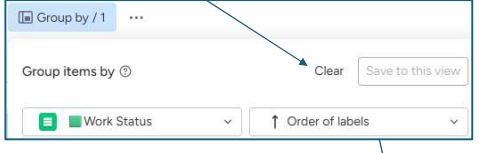

Instruction: Use the Filter option in the Work Status column to display tasks with a specific status.

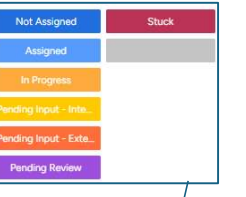

Sample: Assigned

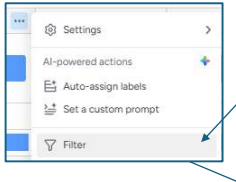

Note: Helps users quickly identify tasks requiring action or follow-up.

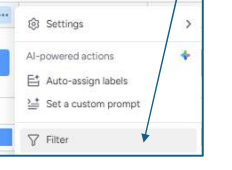

select **Clear** to remove the grouping and return to the normal task view.

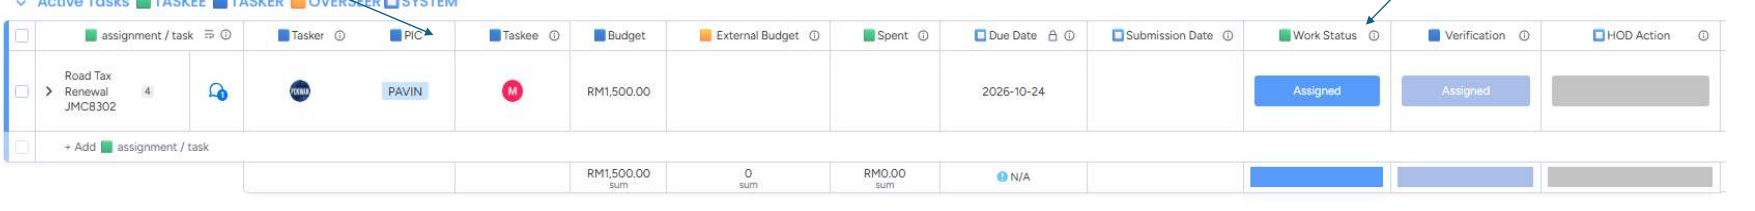

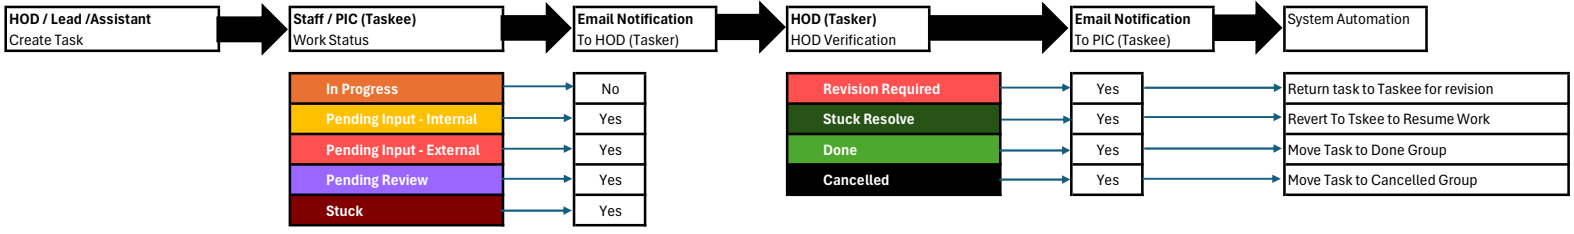

2. WORK FLOW

MONDAY.COM

TASK MANAGEMENT – HOD USER ACCEPTANCE TESTING (UAT)

ASSIGNMENT 1 – GUIDED OPERATIONAL TASK

Objective: Create and assign an operational task using the information provided below.

Instruction: Log in to **monday.com**, open the Create New Task view, and create the following task under the **Not Started Tasks** group.

Column	Information to Enter	Action
Assignment / Task	Annual Fire Extinguisher Servicing	Create a new task under the Not Started Tasks group.
Write a new update	Servicing arrangements and requirements.	Optional. Post an update to provide additional information or instructions to the Taskee.
Subitems	☐ Seek Quotation ☐ Get HOD Approval ☐ Schedule Servicing Appointment ☐ Documentation (Quotation/Service Order/ Invoice) ☐ Upload Invoice to Xero Accounting System	Create each subitem separately to track the individual work stages.
Description / Target	Arrange annual servicing of fire extinguishers and obtain the servicing report and certification.	Enter the task description and expected outcome.
Task Schedule	2–20 November 2026	Set the task start and end dates.
Effort	Medium	Select the estimated level of effort required.
Budget?	**Yes**	**Mandatory.** Select Yes or No for every task. Required for budget performance scoring.
Budget	RM1,500.00	Enter the estimated budget allocated for the task.
External Budget	0	Enter the estimated expenditure involving external parties or suppliers.
Tasker	Yourself (HOD)	Select yourself or a designated second-level person/Team Lead responsible for monitoring, reviewing, and verifying the task.
PIC	PC KWAN	If using a shared email, **select the responsible individual from the dropdown list FIRST.**
Taskee	MA	Select the designated staff member email or shared email account responsible for carrying out the task.
Work Status	Assigned	Change from Not Assigned → Assigned after completing all required columns.

Expected Outcome:
The task is successfully created with complete information, assigned to the appropriate person, and activated in the Active Tasks Group.

ASSIGNMENT 2 – INDEPENDENT TASK CREATION

Objective: Assess the HOD's ability to independently create and assign an actual operational task relevant to their department.

Instruction:

Identify **ONE actual operational task** within your department and create it in the monday.com Task Management Board.

No pre-prepared information, instruction table, or step-by-step guidance will be provided.

HODs are required to independently determine and complete all necessary task information.

Expected Outcome:

The HOD successfully creates and assigns a complete operational task independently, demonstrating an understanding of the Task Management Board and its workflow.

HOD FEEDBACK / REMARKS

Instruction: Please provide your feedback on the Task Management Board and User Guide after completing both assignments.

No.	Feedback / Remarks

Note: Please highlight any difficulties encountered, unclear instructions, or suggestions for improvement.

Purpose: To identify areas for improvement before the final implementation of the Task Management System.
